

DuPage Water Commission Attends Argonne National Laboratory for Earth Day

Date: April 24, 2015

On Wednesday, April 22, 2015, Preserving Every Drop Members Jenessa Rodriguez and Carolyn Johnson attended Earth Day for Argonne National Laboratory employees. Argonne invited various companies to exhibit green initiatives and information. There were also internal green projects that Argonne employees displayed for other employees to peruse during their lunch.

Over 100 rain gauges and leak detection tablets and 80 5-minute shower timers were distributed as well as water conservation pamphlets.

See below for picture(s) from the event.
