## NO WATER RATE INCREASE APPROVED FOR THE NEXT FISCAL YEAR

The DuPage Water Commission approved its budget for Fiscal Year 2021-2022 and will not raise water rates next year.

On Thursday evening, April 15, 2021, the DuPage Water Commission Board approved its Fiscal Year 2021 – 2022 budget which will maintain the current water rate at \$4.97 per thousand gallons. On May 1, 2021, the Commission's customers, which includes most of the municipalities and private water agencies in DuPage county, will not see their water rates increase.

Commission Chairman Jim Zay commented, "I am proud of what the Commission has been able to accomplish over the last six to seven years. Board members and staff remain committed to the goal of maintaining our water rates as low as possible. Not raising the Commission's water rates this year is especially important as residents continue to deal with the economy crisis caused by the Covid-19 pandemic and I am glad that we are able to do our small part to help."

Since January of 2015, the Commission has done an outstanding job at minimizing water rate increase to its customers. During this time frame, the Commission has only raised its total water rate by 2 cents per thousand gallons.

Chairman Zay stated, " Since January of 2015, if you look at household affordability, an average family of four in DuPage using approximately 10,000 gallons per month, have seen their water bills increase by only 20 cents per month due to the Commission's water rate changes. That is less than one penny per day."

The Commission has been able to maintain and minimize its water rates going back to 2015, even considering the following:

- Water rate increases from the City of Chicago, our supplier, which total \$0.31 per thousand gallons,
- Loss of approximately \$35 million in annual revenue with the sunseting of the sales tax each year since 2016,
- Decrease in the Commission's overall water sales of approximately 3%,
- A much larger Capital Improvement Plan.
