

WCAPP Four

Programs:

Water pledge – A commitment by residents to implement specific water conservation efforts.

Toilet leak detection and repair kits – support the identification and repair of toilet leaks.

Rain gauge and landscape watering – Explanation and promotion of appropriate and efficient landscape irrigation practices.

Rain barrel programs – Demonstration projects to promote the purchase, proper installation and efficient use of rain barrels for rainwater harvesting.

Glenbard East High School Class Attends Water Journey Presentation and Tour at DuPage Water Commission

Date: March 17, 2015

Last Wednesday a Glenbard East High School class of thirty students attended a water journey presentation and tour of the DuPage Water Commission (DWC) pumping station.

Manager of Operations Terry McGhee presented the students with a background on the journey of DWC's water from Lake Michigan to the DuPage Pumping Station, to the Commission's customers, and finally residents' taps. He also spoke about DWC's Water Conservation and Protection Program.

Then Operations Supervisor, Mike Weed, lead the students on a tour of the DWC pumping station to get a better understanding of how a pump station works.

The Water Conservation and Protection Program promotional materials that DWC hands out at events were given to the students to use at home to promote water conservation. These items included: shower timers, rain gauges, leak detection tablets, and educational handouts.

See below for pictures from the presentation and tour.

Terry McGhee answering questions about the water journey

Students viewing the Commission's display on how water gets delivered to DWC's customers

Mike Weed showing the students DWC's SCADA system in the control room

Students viewing the motor room

Weed pointing out the different types of pipes DWC utilizes in the field
